Dear Friends of Tender Care,

I hope this letter finds you well. Boy, do we live in turbulent times, and with no end in sight. With the passage of Pro-Life legislation in a number of states, the pro-abortion forces are pulling out all the stops. I am always amazed at the pro-abortion crowd's complete lack of understanding when it comes to life. Even when they ignore or discount that God created all life, even when they discount that the unborn are deserving of all the protections of the born, even when they fail to accept the uniqueness of each human life, they still do not get it.

You may remember the 1993 film "Jurassic Park." Scientists grow dinosaurs from dinosaur DNA. The scientists believe that by only developing or growing females, they can control the population. Jeff Goldblum plays the character Dr. Ian Malcolm, who is visiting Jurassic Park, at the request of the developer, who hopes Dr. Malcolm will give his stamp of approval. Dr. Malcolm tells these scientists creating the dinosaurs that "the kind of control you're attempting, it's not possible....life will not be contained. Life breaks free, it expands....life finds a way." Let that sink in for a moment. We know that despite the calls to "Shout out your abortion," abortion not only destroys life, it also destroys the human spirit. But the human spirit, and life, will find a way.

We have once again had to cancel our Fall banquet – but the fight must go on. Go to our website to see a successful client story at tendercare.org/alice.

During these most trying times, we need your help to renew and refresh the human spirit – to help Life find a way.

Wishing everyone all the best and May God be with you.

Vincent C. Pacelli
